

CITY GOVERNMENT OF VALENZUELA

UNIFIED CITIZEN FEEDBACK SUMMARY

Synchronized PCMS & PHMS Feedback Analysis & Audit Data Lock

Merge ID: UNIFIED-MERGE-20260820-120925-D908D8
Compilation Timestamp: August 20, 2026, 12:09 PM
Compiled By: System Admin

CATEGORY 1: ENVIRONMENT, WASTE & SANITATION (11 Entries)

* Proposed Waste Segregation Enforcement Program [PCMS]

Date: 2026-08-19 | Entries: 4 | Avg Rating: 3.8 | Tone: POSITIVE

Key Insights:

- Stricter segregation schedules are needed because trash collectors still mix organic and recyclable bins during morning pickup.
- We fully support the mandatory segregation policy! Please provide more neighborhood materials recovery facility (MRF) drop-off points.
- Regular barangay eco-seminars and educational flyers in Tagalog would help households comply better with the plastic reduction guidelines.
- Great initiative for cleaner streets. Hopefully the city can provide branded color-coded trash bags to encourage low-income families.

* Plastic Ban Enforcement [PCMS]

Date: 2026-08-19 | Entries: 5 | Avg Rating: 3.4 | Tone: POSITIVE

Key Insights:

- Public markets need strict inspection for single-use plastic bags. Reusable bayong incentives should be introduced.
- Supermarkets and fast-food chains must comply with paper packaging; penalties for violations should be enforced.
- Conduct eco-friendly packaging trade fairs so small sari-sari store owners can source affordable paper alternatives.
- Provide a 60-day grace period for small vendors to transition away from existing plastic bag inventories.
- School zero-waste campaigns and barangay plastic redemption centers encourage youth participation.

* Public Consultation on the Improvement of Parks and Open Spaces [PCMS]

Date: 2026-08-19 | Entries: 1 | Avg Rating: 3.0 | Tone: NEUTRAL

Key Insights:

- Public parks need clean, accessible public restrooms and dedicated drinking fountains for seniors and children.

* Proposed Community Park Lighting Improvement [PCMS]

Date: 2026-08-19 | Entries: 1 | Avg Rating: 2.0 | Tone: NEGATIVE

Key Insights:

- Defective lights must have a 48-hour repair response time so dark corners do not become crime hazards.

CATEGORY 2: INFRASTRUCTURE, DRAINAGE & FLOOD CONTROL (11 Entries)

* Proposed Waste Segregation Enforcement Program [PCMS]

Date: 2026-08-19 | Entries: 1 | Avg Rating: 2.0 | Tone: NEGATIVE

Key Insights:

- Need clearer fines and penalty enforcement for commercial establishments that dump non-biodegradable waste into open waterways.

* Proposed Flood Control and Drainage Improvement Plan [PCMS]

Date: 2026-08-19 | Entries: 4 | Avg Rating: 3.0 | Tone: NEUTRAL

Key Insights:

- The drainage culverts along McArthur Highway frequently clog during high tide. High-capacity pumping stations should be prioritized.
- Upgrading neighborhood street drainage before the typhoon season will greatly reduce water buildup in residential compounds.
- Please coordinate road diggings with water utility companies so newly paved roads are not immediately destroyed for pipe repairs.
- Debris traps along major river outlets are essential to maintain fast water discharge during heavy rainfall.
